MATÍAS CALÓ

Product-Minded Full-Stack Developer · Applying AI in Production

Buenos Aires, Argentina · +54 9 11 3003-2002 · matiascalo2@gmail.com · linkedin.com/in/matias-calo · aturno.app

PROFILE

Product-minded developer who took Aturno, a WhatsApp-native B2B SaaS, from idea to production: UX, data model, frontend, backend, and go-to-market. I define the roadmap and business case, then build it with an AI-assisted workflow (Claude Code, Codex), and I'm deepening into applied AI engineering (LangChain, LangGraph, RAG, MCP). Comfortable across the stack — JS/TS, React, Node.js, Python, SQL. Bilingual, Digital Business graduate, Italian/EU citizen (no sponsorship needed for EU roles).

KEY STRENGTHS

- Product ownership end-to-end: defined roadmap, business model, and go-to-market for Aturno, then built it myself.
- Full-stack execution: own features from data model to UI to deployment, solo.
- AI in production: Claude Code and Codex are core to my daily workflow; deepening into LangChain, RAG, agents.
- Business + technical fluency: credible in roadmap discussions, customer pitches, and code reviews.

EXPERIENCE

Founder & Product/Full-Stack Developer | Aturno — Independent Project (Thesis → B2B SaaS) | 2025 – Present

- Took Aturno from concept to a complete, production-ready app in 3 months (WhatsApp-native scheduling for salons, clinics, gyms).
- Owned product decisions end-to-end: roadmap, data model, and business model, solo.
- Built frontend in React/JavaScript; backend and auth on Firebase; deployed on Render.
- Built a Python tool on the Google Places API to score and rank 2,000+ businesses by rating and digital-presence gaps for outreach.
- Used Claude Code and Codex throughout to accelerate iteration and expand scope solo.
- Presented as thesis project, Bachelor's degree in Digital Business (2025).

SKILLS

- Product & Strategy: roadmap definition, data model design, go-to-market strategy, customer discovery, prioritization.
- AI Engineering: Claude Code, Codex, LangChain, LangGraph, RAG, MCP (in progress, Coderhouse).
- Languages & Frameworks: JavaScript, TypeScript, Python, React, React Native, Node.js, HTML, CSS, SQL.
- Backend & Infra: Firebase, REST API integrations, Render.
- Languages: Spanish (native), English (B2, IB Diploma).

EDUCATION

Licenciatura en Negocios Digitales (Digital Business) | Universidad de San Andrés | 2025

International Baccalaureate Diploma (Bilingual) | St. John's School

CERTIFICATIONS & TRAINING

- Coderhouse: AI Engineer program — LangChain, LangGraph, RAG, MCP, multi-agent systems (in progress).
- 10+ years of independent creative production (Premiere Pro, After Effects, Ableton Live) — self-taught, ships without a team.
